

# EXTREME COLD 4-STROKE OIL

**XPS® Full Synthetic Extreme Cold 4-Stroke Oil** was specifically developed to provide excellent cold weather oil flow in winter climates. XPS Extreme Cold helps ensure optimum engine performance, protection and longevity for Ski-Doo® and Lynx® snowmobiles equipped with Rotax® ACE engines throughout the winter season.

- » Quick, easy engine starting at temperatures below -40°F
- » Ultimate cold-weather and cold engine protection

## KEY FEATURES

**Cold Start Engine Protection:** Most engine damage occurs at engine start up. XPS® Extreme Cold has a low pour point for superior cold start protection against engine wear with faster oil circulation.

**Premium, Full Synthetic Oil:** XPS® Extreme Cold is engineered from premium high-quality base stocks and esters and it stays consistent across a broad temperature range.

The XPS 4-Stroke line is now engineered in three formulas – the semi-synthetic Summer Grade, full synthetic All Climate, and Extreme Cold. See how they compare:

## XPS 4-STROKE OILS

	Summer Grade	All Climate	Extreme Cold
SAE Viscosity	5W-40	0W-40	0W-20
Superior engine protection	✓	✓	✓
Superior polymers for protection from shear and breakdown	✓	✓	✓
Custom additive package for the unique needs of Rotax engines	✓	✓	✓
Full Synthetic formula for the best lubricating film	✗	✓	✓
Better cold start for most winter regions	✗	✓	✓
Best cold start protection for extreme winter regions	✗	✗	✓
Cold weather pour point/flow temperature	-35°C/-31°F	-45°C/-49°F	-60°C/-76°F
